JOHN MIGUEL DUNGAO

WEB DEVELOPER

PROFESSIONAL SUMMARY

Web Developer with extensive expertise in full-stack development, specializing in technologies such as Javascript, Postgres, React, and NodeJS. Proven track record in designing scalable web applications, notably a streaming platform at Zenkai, featuring robust RESTful APIs and secure data management. Dedicated to optimizing application functionality and enhancing user engagement through technical precision and innovative solutions.

SKILLS

Javascript

Postgres

React

NodeJS

Restful API

Python

Mobile Responsive

EMPLOYMENT HISTORY

Web Application, Zenkai

- Developed a highly responsive and efficient SPA using ReactJS, leveraging its component-based architecture, state management and virtual DOM, resulting in significantly faster loading times and improved user experience.
- Designed and built RESTful APIs using Node.js to handle data retrieval and manipulation.
- Design and Implemented a well-structure database schema to efficiently store and retrieve information using PostgreSQL, improving application speed and scalability.
- Integrate Bcrypt to hashed and securely stored user passwords to ensure data protection and the integrity of the application.
- Optimized application performance through efficient code and caching mechanisms.

EDUCATION

AUG 2023 - APR 2024

Certification, Fullstack Academy

- Developed proficiency in ReactJS, JavaScript, DOM manipulation, backend development, authentication and PostgreSQL
- Implemented full-stack web applications utilizing modern technologies and best practices
- Collaborated with peers on group projects, honing teamwork and communication skills

SEP 2016 - APR 2018

Associate, Saint Peter's University, Jersey City, NJ

- Studied data structures, algorithms, and object-oriented programming in Java
- Gained proficiency in web development technologies: HTML, CSS, and JavaScript
- Completed coursework in advanced mathematics, including calculus and linear algebra

PRESENT

Zero to Mastery

- Completed a comprehensive online course on full-stack web development
- Learned and applied skills in HTML, CSS, JavaScript, React, Node.js, and other web technologies
- Developed hands-on projects to gain practical experience in building web applications
